TAY SUI SIN

Senior Frontend Developer

011-1098 3965 | taysuisin.private@gmail.com | github.com/SuisinTay | linkedin.com/in/tay-suisin-732253172

PROFILE SUMMARY

Senior Frontend Developer with 4+ years of experience building scalable, user-focused web applications, recently promoted for leading large-scale platform migrations. Skilled in ReactJS, NextJS, and TypeScript for frontend development, with hands-on backend and DevOps experience in Golang, Node.js, MongoDB, Docker, and AI-assisted development workflows. Currently leading a regional V1 to V2 migration and driving third-party integration work, while separately architecting backend infrastructure for a fitness marketplace platform.

TECH HIGHLIGHTS

Frontend: ReactJS, NextJS, TypeScript, MobX, SCSS, HTML, CSS
Backend: Golang, Node.js, Express
Database: MongoDB, SQL
Automation & DevOps: Docker, Bash, n8n, Git, CI/CD, AI-assisted development workflows
Other: WebSocket, RESTful APIs, Jest, Postman, Third-Party/Consent Integrations

PROFESSIONAL EXPERIENCE

Deriv Sdn Bhd – Cyberjaya

Senior Frontend Developer (promoted from Frontend Developer, Jul 2026) | Apr 2022 – Present

- Promoted to Senior Frontend Developer in July 2026 in recognition of technical leadership and delivery on migration initiatives.
- Completed the V1 to V2 migration project and currently lead the EU V1 to V2 migration, coordinating scope and delivery across the initiative.
- Own integration of third-party connections into the frontend, including consent integration workflows.
- Adopted AI-assisted development practices and built internal skills/tooling to streamline production release and patch processes.
- Implemented features including phone number verification, RTL website support, and multi-language translation management.
- Created an automated Docker release workflow for the Passkey project using Bash, and an n8n-based automation workflow for automatic Slack translation.
- Collaborated with designers and backend developers to deliver performant, user-centric trading features.

Panda Software Sdn Bhd – Melaka

Web Developer (Intern/Part-Time) | Mar 2021 – Dec 2021

- Built business overview dashboards and an e-commerce system from scratch using VueJS (Vue3).
- Worked closely with the BI team to integrate APIs and SQL data pipelines.
- Gained hands-on experience across the frontend and backend development lifecycle.

PROJECTS

Fitnect – Fitness Marketplace App (Backend Developer)

Freelance / Co-founder collaboration with two peers – Ongoing

- Own the full backend architecture and hosting for a fitness marketplace platform connecting users with trainers, including booking and real-time chat.
- Leading the platform through a major backend restructuring effort.
- Set up automated deployment pipeline that triggers on merge to main, streamlining release workflow.
- Currently evaluating payment gateway (IPG) providers for platform integration.
- Built using Golang, Node.js, MongoDB, and WebSocket, hosted on Render, with a strong focus on API design and real-time message handling.

EDUCATION

Taylor's University – Bachelor of Software Engineering (Hons), 2021 | CGPA: 3.55

INTI Nilai University – Foundation in IT, 2018 | CGPA: 3.33
